 Zone 3: White

# INDIANA DEPARTMENT OF CORRECTION

## ADULT FACILITIES

### Minimum Security Facilities: (Level 1)

These facilities have the least restrictive security measures. Housing is dormitory style. Offenders in these facilities typically are serving short sentences of nonviolent, non-weapons-based offenses. Also included as minimum security are work release program offenders, who leave the facility for outside employment but return nightly.

- [Atterbury Correctional Facility](#)
- [Chain O'Lakes Correctional Facility](#)
- [Edinburgh Correctional Facility](#)
- [Henryville Correctional Facility](#)
- [Indianapolis Men's Work Release](#)
- [Indianapolis Women's Work Release](#)
- [Madison Correctional Facility](#)
- [Miami Correctional Facility](#)
- [Medaryville Correctional Facility](#)
- [South Bend Work Release](#)

### Medium Security Facilities: (Level 2)

These facilities have a moderate degree of security measures. Housing is dormitory style. Offenders typically have shorter sentences than level 3 offenders. Medium security offenders are less aggressive than level 3's and 4's, have shorter sentences and a shorter criminal history.

- [Branchville Correctional Facility](#)
- [Correctional Industrial Facility](#)
- [Lakeside Correctional Facility](#)
- [New Castle Correctional Facility](#)
- [Plainfield Correctional Facility](#)
- [Putnamville Correctional Facility](#)
- [Rockville Correctional Facility \(Women\)](#)
- [Westville Correctional Facility](#)

### High Medium Security Facilities: (Level 3)

These facilities have a moderately high degree of security measures. Housing is celled space. Typically more aggressive offenders than level 1 and 2 could be serving longer sentences and have a long criminal history.

- [Miami Correctional Facility](#)

- [Wabash Valley Correctional Facility](#)

**Maximum Security Facilities:** (Level 4)

These facilities have very restrictive security measures. Housing is celled space. Level 4 offenders typically have been convicted of violent or weapons-based offenses. These offenders require close supervision and tight security to minimize risk to the public, staff and other offenders.

## JUVENILE FACILITIES

**Minimum Security Facilities:**

These facilities serve medium/low risk offenders:

- [Bloomington Juvenile Correctional Facility](#)  
This facility for juvenile males, is self contained, with no segregation, has some temporary leaves; has substantial programming/activities outside the facility; weekend visitation; and offers extensive group and individualized treatment.
- [Ft. Wayne Juvenile Correctional Facility](#)  
This facility for juvenile females, is staff secure; does not have segregation; allows temporary leaves; has an on-site education program; offers extensive group and individualized treatment; has weekend visitation; and allows for activities in the community on a regular basis.
- [Northeast Juvenile Correctional Facility](#)  
This facility for juvenile males is self contained; has no segregation areas; has limited programs/activities outside the facility; allows temporary leaves; has visitation; Juveniles are allowed to work in the community.
- [South Bend Juvenile Correctional Facility](#)  
This facility for juvenile males, has limited segregation area; allows temporary leaves; has community based school programs, as well as in facility education programs; has extensive programming in the community; and visitation.

**Medium/Minimum Facility:**

These facilities serve primarily juveniles with serious property offenses, drug dealing/possession offenses, and selected personal offenses.

- [North Central Juvenile Facility](#)  
Housing at this juvenile male facility is within fenced areas; facility allows temporary leaves; visitation; and limited activities outside the facility. This facility also receives all juvenile male parole violators who are housed pending a parole hearing and reassignment.
- [Camp Summit](#)  
This facility for juvenile males, is self contained; has no segregation area; has no temporary leaves; no programs off the facility grounds; and limited visitation. The boot camp program is highly structured and purposeful, with daily routine emphasizing military structure and decorum, physical fitness, academics, life skills, peer group resolution and individual challenges.

**Maximum/Medium/Minimum Facilities:**

These facilities are set aside for more serious offenses with a recommendation of a one year minimum stay.

- [Indianapolis Juvenile Correctional Facility](#)  
This facility for juvenile females, is staff secure; has campus style cottages; a maximum security unit; has short term segregation; observation cells; programs/activities outside the facility grounds; allows temporary leaves; and allows visitation. This facility also provides intake/diagnostic services for juvenile females.
- [Pendleton Juvenile Correctional Facility](#)  
This is a maximum security juvenile male facility with razor wire fencing. The facility has campus style cottages and self-contained intensive treatment units for juveniles with extremely serious emotional problems or a severe character disorders. The facility has a full range of educational, medical, psychological and psycho-educational services.
- [Plainfield Juvenile Correctional Facility](#)  
This is a maximum security juvenile male facility with razor wire fencing. The facility has campus style cottages and self-contained intensive treatment units for juveniles with extremely serious emotional problems or a severe character disorders. The facility has a full range of educational, medical, psychological and psycho-educational services.

**Intake:**

- [Logansport Juvenile Intake/Diagnostic Facility](#)  
This facility for juvenile males, is self contained; has locked cells in each day room; has segregation cells; has close observation cells; does not allow temporary leaves; and has restricted visitation. This maximum security facility receives any male juvenile between the ages of twelve and eighteen that is committed to the Indiana Department of Correction, Division of Juvenile Services. This facility also receives transfers from other DOC male juvenile facilities for reclassification or short-term disciplinary segregation.

**Family and Social Services Administration Facilities**

**Logansport State Hospital** has served persons with mental illness since 1887. In 1998, a new facility was opened that houses most of the 376 patients. Construction is currently underway to build an expanded forensic program which will increase the capacity from 66 to 105. This unit is expected to be completed by July, 2005. New construction will also include space for a medical clinic, pharmacy and maintenance. The hospital is composed of five service lines that provide care to adults with mental illness and/or persons who are developmentally disabled. Service lines are: Admission Stabilization Services, Forensic Services, Mentally Ill and Developmentally Disabled Services, Skill Development and Community Placement Services, and Continuous Psychiatric Care Services

**Madison State Hospital** has served persons with mental illness since August, 1910. The hospital's current capacity is 150 beds. Groundbreaking for the new replacement facility occurred June, 2003 with completion in July/August, 2005. The hospital is composed of two service lines that provide care to adults with mental illness and/or adults who are developmentally disabled. Service Lines are: Adult Psychiatric Services and Adult Mentally Retarded/Developmentally Disabled.

Both hospitals continue to maintain Joint Commission on Accreditation of Healthcare Organizations (JCAHO) and certification as an Intermediate Care Facility for the Mentally Retarded (ICF/MR). Maintaining this accreditation and certification improves quality of care and maintains reimbursement status.

Treatment is individualized through interdisciplinary assessments and may include stabilization of symptoms through psychopharmacology, management of medical problems, individual and group therapy, patient and family education, rehabilitation and recreation therapy, academic and skills training, vocational training, and supported employment. Dietary services is an active part of the treatment process for each patient in addition to providing nutrition to those receiving treatment and working at these facilities. Services of a clinical dietician must be provided to be involved with treatment teams and to guide the development of menus and alternative choices, where required.

#### **Accreditation, certification and treatment planning issues**

The contractor must be able to assure compliance with all applicable regulations and standards required by Joint Commission on Accreditation of Hospitals, Joint Commission on Accreditation on Behavioral Health Care Facilities, Medicaid/Medicare Hospitals, and Federal Regulation for Intermediate Care Facilities for the Mentally Retarded. Nutritional Services must be designed in a way that promotes normalization and is within the active treatment program that is designed for the patients served.

These regulations require the following but are not limited to:

- Ability to provide for timely assessment of the patients' nutritional needs (often within 24 hours).
- Ability to provide for appropriate plan of care to meet the patients needs working with in an interdisciplinary team environment. Examples include modified diets, calorie control, texture, etc.
- Ability to provide food and nutrition products for the patient as appropriate to care, treatment and services. This includes variety of style of dining, including cafeteria style, family style dining, plating and serving food to dining area, and or tray delivery.
- Ability to adjust dietary needs with cultural, religious, and ethnic food preferences.
- Ability to substitute food of equal nutritional value when patients refuse food.
- Ability to assure safety of all activities related to storage, temperature, light, moisture, ventilation and security.
- Ability to provide for all activities related to preparation and delivery of meals and nutritional products to the patients.

- Ability to provide for educational needs of the patients in regards to food and medication interaction.

Ability to provide licensed clinical dieticians to oversee food service program assuring quality services. In addition to being an active
